

This technique is a great way to increase revenue in the salon.

Push back cuticles and remove protein growth on all 10 toes.

Apply a thin layer of Base gel to first foot.

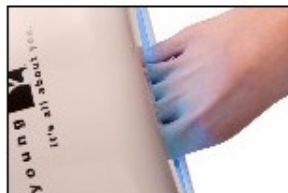

Make sure there is an even coat on all 5 toes.

Sprinkle glitter to completely cover the nails.

Make sure the glitter covers the nail plates completely.

Cure in lamp for a minimum of 30 seconds.

When the first foot is removed from the gel lamp, brush off the excess glitter with a manicure brush.

Make sure there is an even coverage on the nail plates.

Apply a second coat of Base gel on all 5 toenails.

Sprinkle glitter over the bare spots.

Cure in lamp for a minimum of 30 seconds.

Dust off the excess glitter.

Apply a thin coat of Flex gel on all toes and cure for 2 min.

Cure for 2 minutes.

Remove the first foot from the lamp after curing, and remove the sticky residue with Swipe.

Lightly buff the surface with the Sponge Buffer.

Apply Finish gel on the first foot and cure for two minutes.

When both feet are completely cured, use your 240 file/buffer to remove any rough edges around the free edge.
