

This radical stiletto design incorporates the use of impression tools and neon colored acrylics.

After proper preparation of the natural nail, apply the Artistic nail forms for a stiletto shape and build a thin free edge of Speed Clear to the natural nail.

Apply a thin layer of Rainbow Black to cover the surface.

Apply Speed Clear over the surface of the whole nail.

Allow the Speed Clear to set slightly.

Dipping your Impression Tool into the powder first will prevent it from sticking to the wet acrylic.

Make sure to press firmly into the acrylic with the Impression Tool to create a deep enough impression.

You can use C-Curve sticks to create cylindrical shapes.

Use several different shapes and cover as much surface area as possible, making about three impressions.

Use the C-Curve stick and cover as much surface space as possible, making about three impressions.

Once the enhancement has dried, use the I-Formation road map to file the nail into the proper shape,

Once nails have been filed and shaped, apply a thin coat of finish and cure for 2 minutes.
